

WALP manual

(Ver.20140331_en_A)

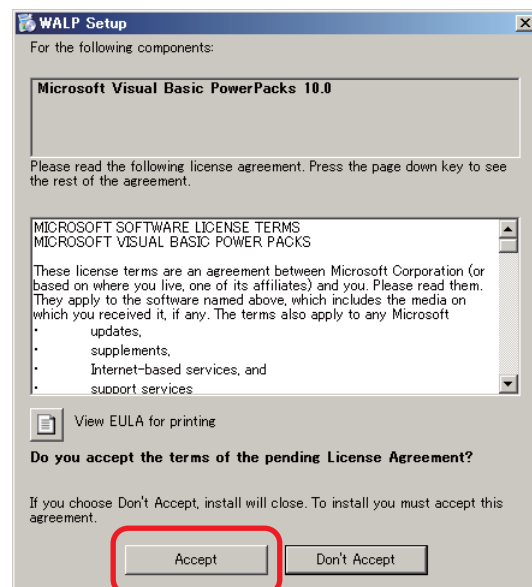

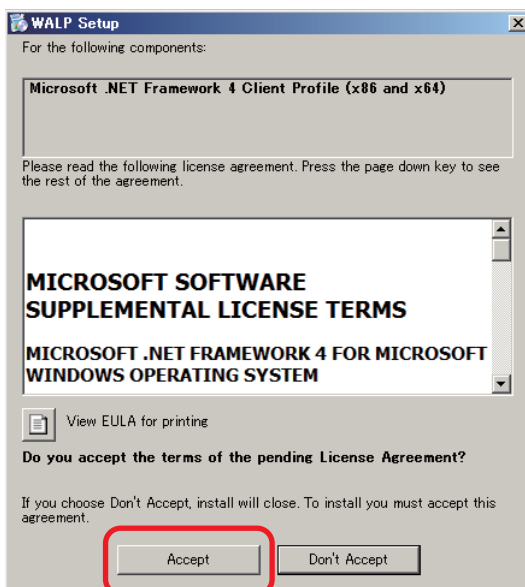

Setup

1) If WALP(old version) is already installed in your PC, Uninstall it before you install WALP(new version).

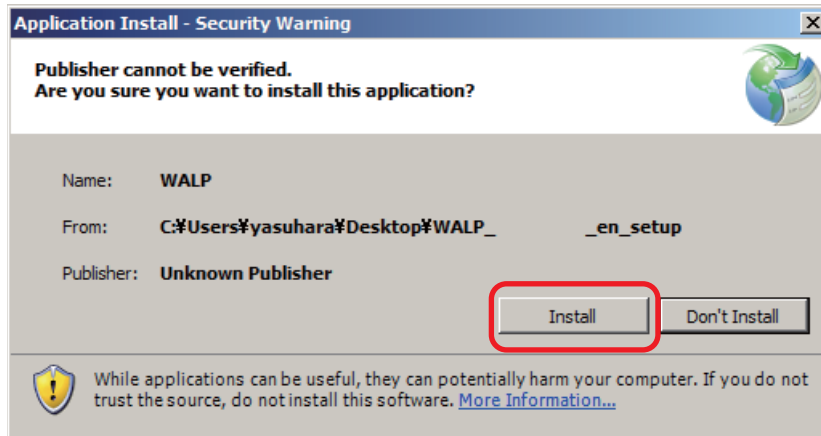

2) Extract "WALP_yyyyymmdd_en_setup.zip". You can find "setup.exe" in the folder. Double-click "setup.exe" to start setup process.

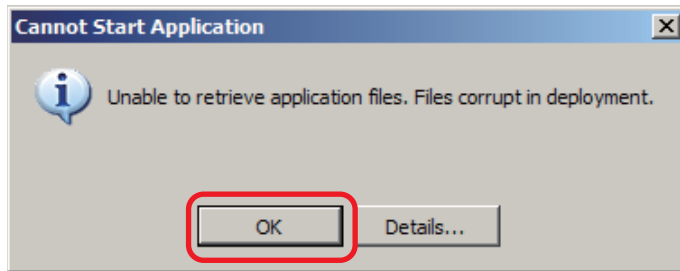

3) WALP requires "Microsoft .NET Framework" and "Microsoft Visual Basic Power Packs". If they are not installed in your PC, they are installed automatically before WALP installation.

4) Install WALP.

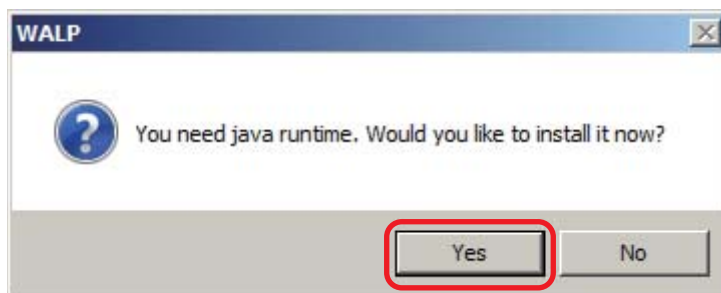

Caution If you see the indication below, click "OK" and start the setup process again by "setup.exe".

5) After installation, WALP application starts automatically.

6) WALP requires "Java Runtime". If it is not installed in your PC, the message below appears. Click "Yes" and install "Java Runtime".

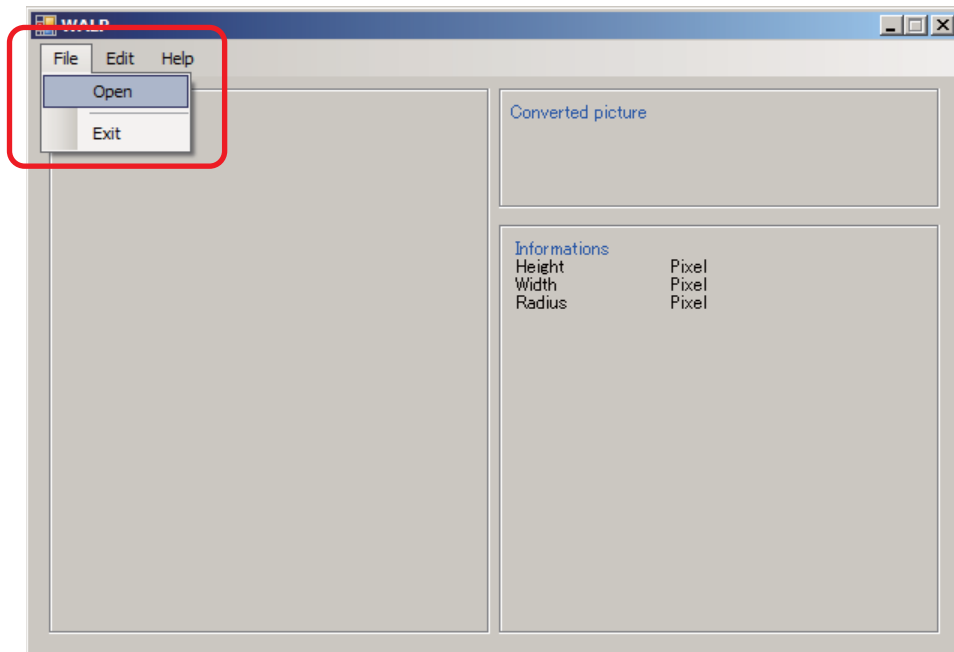

Operation

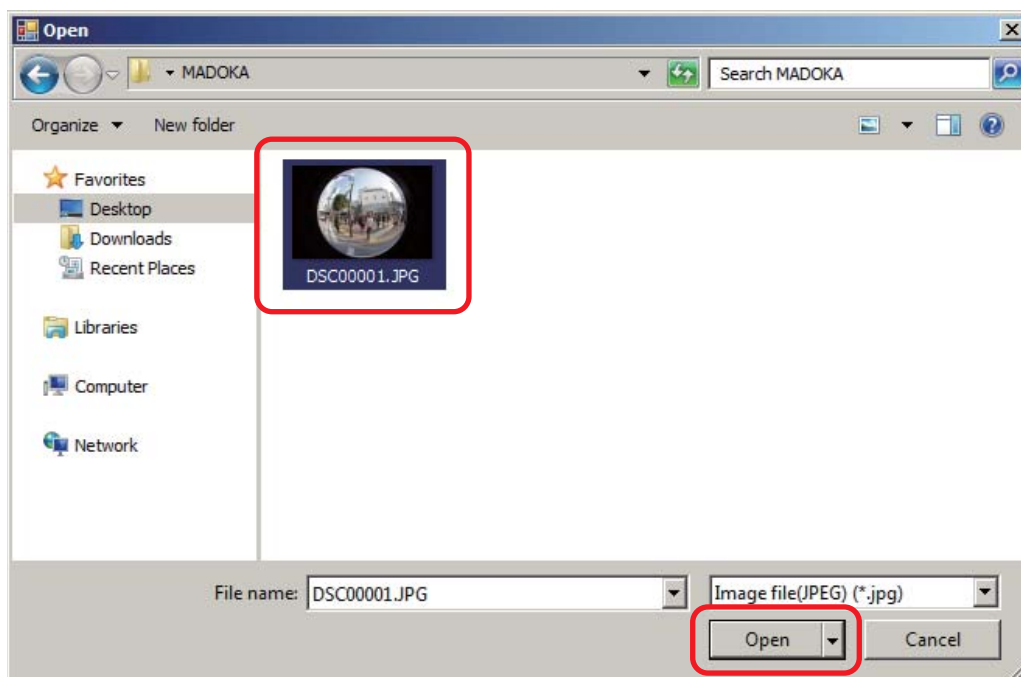

1) Double-click the WALP icon on the desktop. WALP starts.

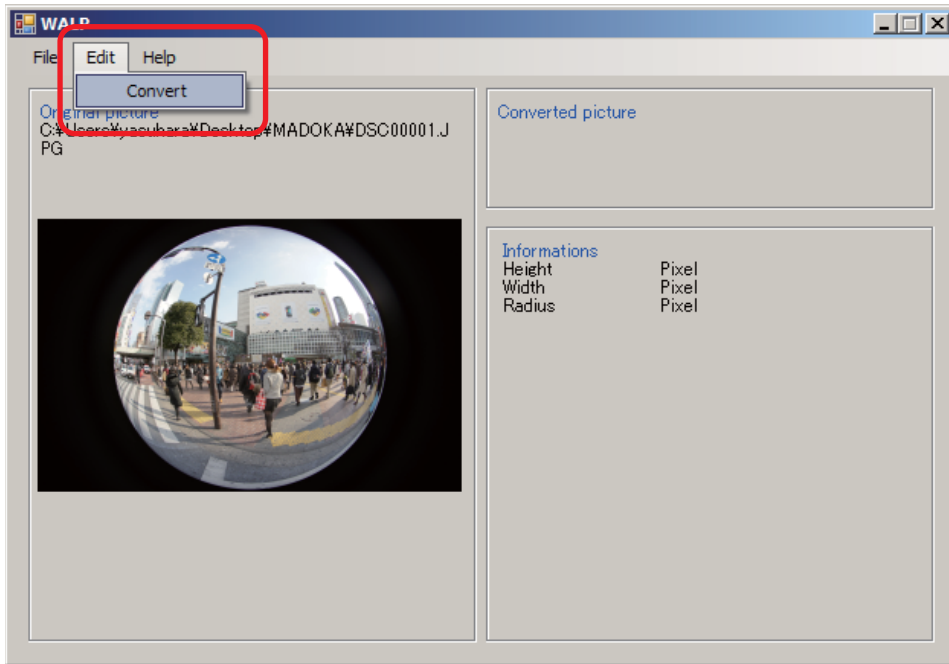

2) Select "File" → "Open".

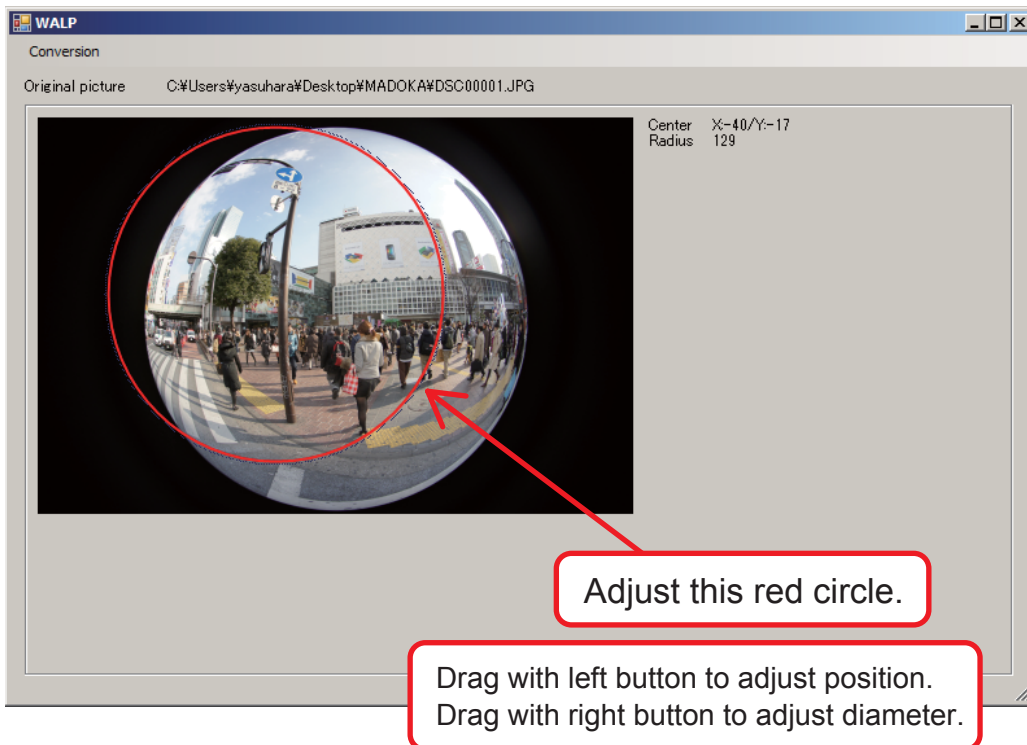

3) Choose a MADOKA picture file.

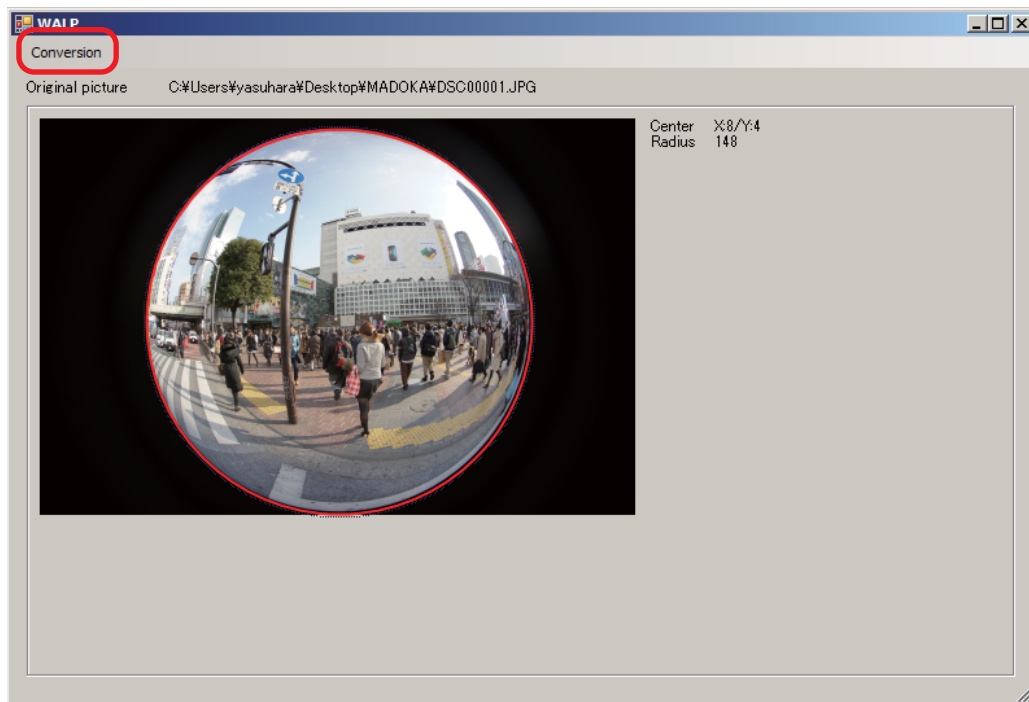

4) Select "Edit" → "Convert". A new window opens.

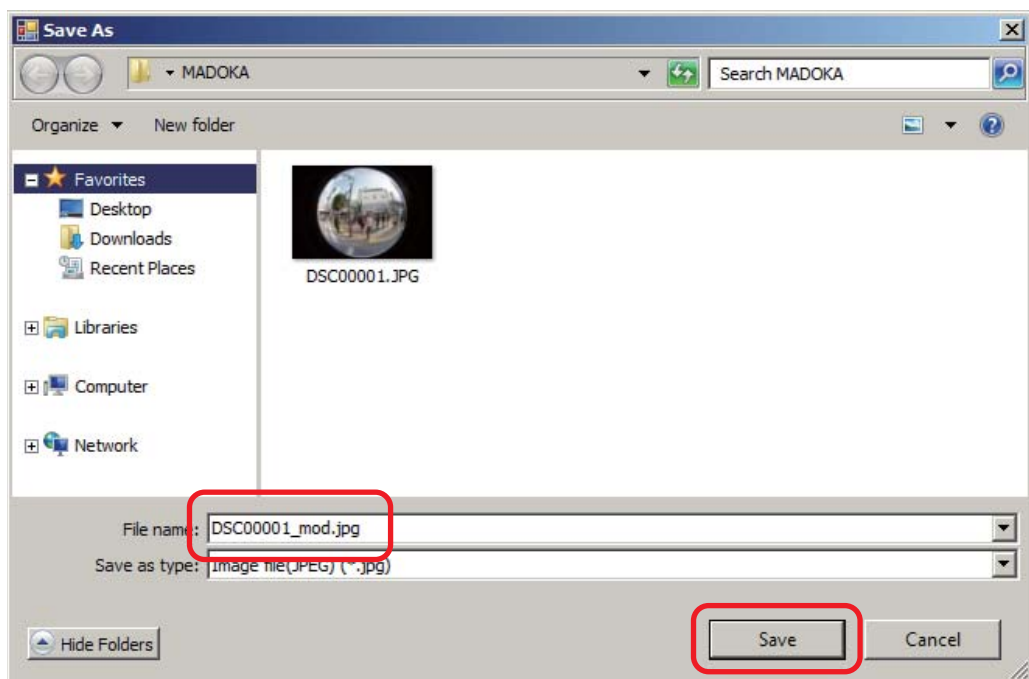

5) Adjust the red circle to fit to the picture area.

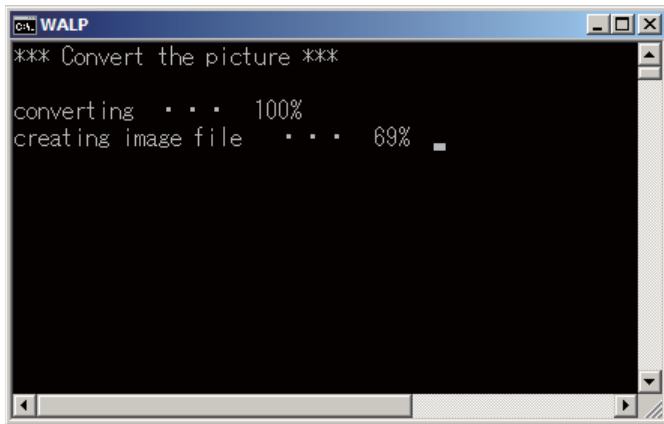

6) Click "Conversion".

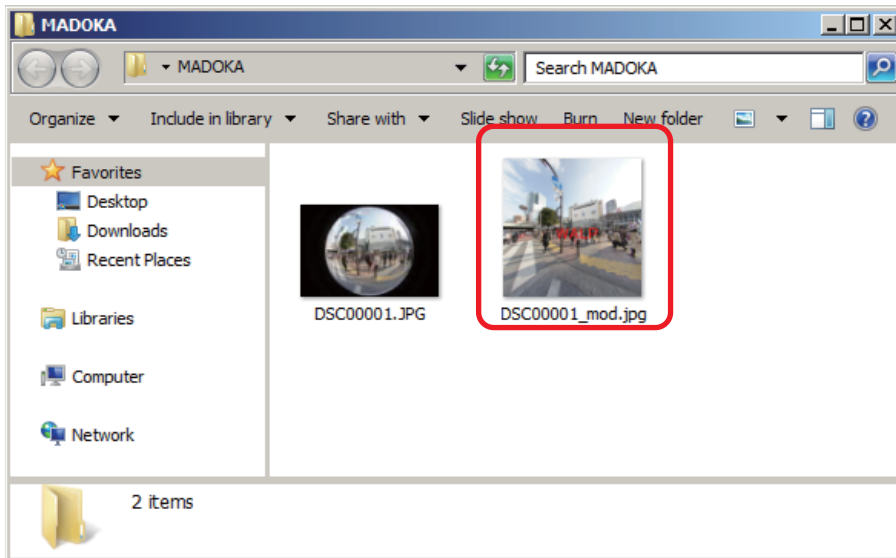

7) Set the file name.

8) In conversion process, The window below appears.

9) Converted picture is generated.

License key

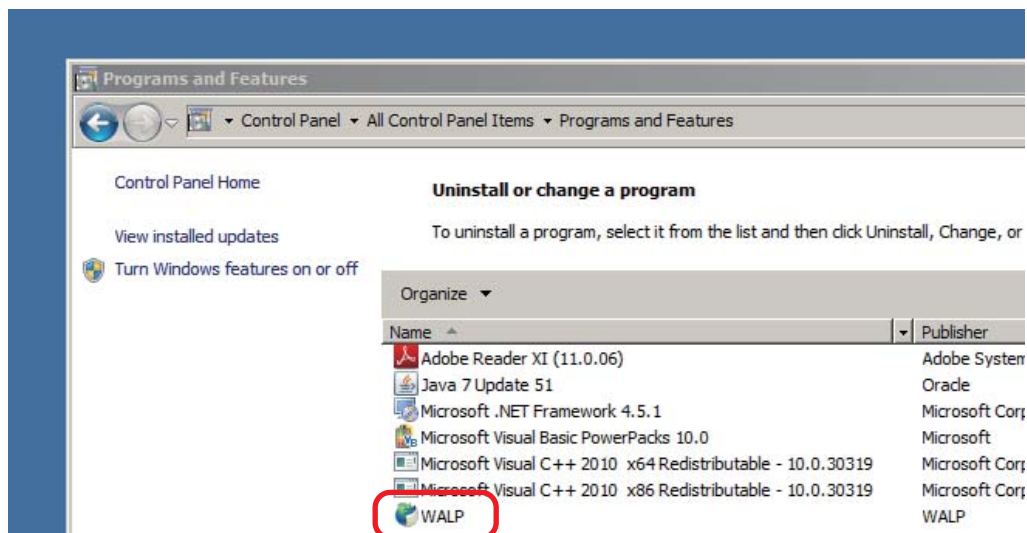

- 1) Select "Help" → "About WALP".
- 2) Enter the license Key.

After you enter the license key, you can convert MADOKA pictures without seeing red "WALP" letters on the converted pictures.

Uninstall

Uninstall WALP from "Control Panel" → "Programs and Features" options.

Caution

"Microsoft .NET Framework", "Microsoft Visual Basic Power Packs" and "Java Runtime" may be used for other software. If you uninstall these programs, it may cause some problems.
